### Objectives and Investment Policy

The investment objective of the Fund is to provide a combination of capital growth and income over the longer term (5 years).

The Fund will seek to achieve its objective by investing primarily (at least 70%) in international equity securities with a focus (c.40%) on companies which are listed in Asia.

The Fund may also invest in other types of transferable securities (including ETFs), bonds, precious metal exchange traded funds and indirectly via collective investment schemes (including those managed and/or operated by the ACD or Investment Manager). Investment in collective investment schemes will also provide the Fund with indirect exposure to other asset classes such as commodities.

The Fund may also invest in money market instruments, deposits, cash and near cash.

Save as noted above in respect of a focus on Asia, the Fund will not have any particular geographic or industry or economic sector focus and as such weightings in these may vary as required.

Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) may be used for efficient portfolio management purposes.

The Fund does not have a specific benchmark. The performance of the Fund can be measured by considering whether the objective is achieved (i.e. whether there is capital growth and income over the long term).

You can buy and sell shares in the Fund on any business day.

If you hold accumulation shares, income from the Fund will be added to the value of your investment.

If you hold income shares, any income from the Fund will be distributed every three months.

The Fund may be suitable for investors who are willing to invest over the medium to longer term (5 years).

For full investment objectives and policy details please refer to the prospectus.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower risk ← Higher risk  
 Typically lower rewards      Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 4 because simulated monthly historical performance data indicates that it has experienced average rises and falls in market prices historically.

The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, such as those providing safe keeping of assets, services or those acting as counterparty to derivatives, can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Liquidity Risk:** adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- **Risk from use of derivatives:** Investments in derivatives may result in gains or losses that are greater than the original amount invested.

For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.
