

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### VT Garraway Diversified Fixed Interest Fund (the "Fund") a sub-fund of VT Garraway Investment Fund Series II (the "Company") Class A Income Shares (ISIN: GB00BZ1KRC48)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

#### Objectives and Investment Policy

The Fund is an actively managed fund that aims to provide a high level of income, primarily through investment in a concentrated portfolio of fixed interest securities, with consideration given to capital return.

The Fund seeks to gain exposure in fixed interest securities primarily through investment in collective investment schemes and investment trusts or by investing directly in fixed interest securities and other transferable securities. These are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of the capital may fall, and vice versa. Inflation may also decrease the real value of capital. The mix between government securities, investment grade and high yield assets may vary depending upon the investment manager's view of prevailing conditions and prudent spread of risk. Money market instruments, equities and cash deposits may also be held from time to time.

In seeking to reduce risks or costs, or to generate additional capital or income, the Fund makes use of derivatives (financial instruments whose value is linked to the expected future price movements of the underlying assets) in line with the Fund's risk profile. The Fund's use of derivatives can be extensive and could involve complex derivative instruments or strategies in order to achieve the investment objective and protect the capital value from risk. This can result in exposure greater than the value of the underlying assets. In such situations, performance may rise or fall more than it would otherwise. Derivative transactions are entered into directly with an eligible person or institution (a "counterparty"). This may pose the risk that the counterparty or exchange may not meet its obligations or becomes insolvent which could cause the Fund to incur a loss.

The Fund is suitable for investors seeking an above-average level of bond income that is also managed with a view to mitigating the losses periodically associated with investments in higher-risk bonds. The Fund can be used as an income-oriented solution in its own right or at the heart of a range of investment selections.

#### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower risk Higher risk  
←-----→  
Typically lower rewards      Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 3 because weekly historical performance data indicates that it has experienced low to medium rises and falls in market prices historically.

The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.

The following risks are material in addition to the risks captured by the indicator above:

- **Capital Risk:** Some or all of the annual management charge is taken from capital. This may constrain the potential for capital growth.
- **Investment Risk:** The Fund invests in other funds, which may increase losses due to restriction on withdrawals, less strict regulation, use of derivatives, investment in risky assets such as property or commodities, or investment in a range of investment trusts that may trade at discounts to the Net Asset Value, or which may borrow larger amounts than their available capital. This can accentuate any gains or losses suffered by the underlying investment trusts. The Fund may also use certain instruments, such as ETFs, which can be leveraged and gain more exposure to the underlying asset class. These instruments may be more volatile in nature and as such can contribute to return to the Fund more than the underlying exposure both positively or negatively.
- **Derivative Risk:** Certain derivatives may result in gains or losses that are greater than the original amount invested. Derivatives also involve counterparty risk, which is the risk of a counterparty not meeting its contractual obligations as part of the derivative contract. It also involves leverage risk, which arises from entering into derivatives contracts whose terms have the effect of magnifying an outcome, meaning profits and losses from investment can be greater.
- **Currency risk:** The Fund invests in assets denominated in currencies other than the Fund's base currency. Changes in exchange rates may have a negative impact on the Fund's investments.
- **Liquidity risk:** Any security could become hard to value or to sell at a desired time and price, increasing the risk of investment losses.
- The full list of the Fund's risks is contained in the "Risk Factors" section of the Fund's prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing charges	1.74%
-----------------	-------

### Charges taken from the fund under certain specific conditions

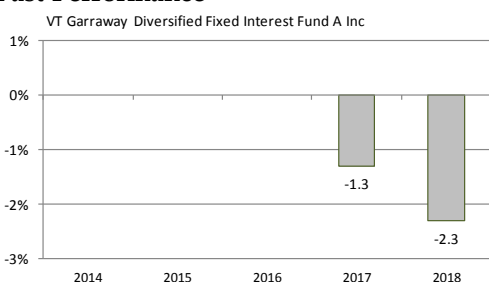

Performance fee	None
-----------------	------

The ongoing charges figure is based on expenses for the twelve months ending 30 September 2018. This figure may vary from year to year. The ongoing charges are taken from the capital of the Fund. It excludes portfolio transaction costs. The Fund's annual report for each financial year will include detail on the exact charges made.

You may also be charged a dilution levy on entry to or exit from the fund.

For more information about charges, please see section 7 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

## Past Performance

Source: City Financial Investment Company Limited

### Past performance is not a reliable guide to future performance.

The past performance in the chart shown opposite is inclusive of tax and charges, but excludes the entry charge that may be paid on the purchase of an investment.

The Fund was launched on 7 March 2014. The share class was launched on 1 February 2016.

Performance is calculated in Pounds Sterling.
