### **COMPANY OVERVIEW**

Size of Company £58,075,806

Launch date 29 May 2012

### Company objective and policy

The aim of the Fund is to provide a combination of capital growth and income.

The Fund may also invest in other types of transferable securities and in companies which are not UK listed. At any one time, the Fund may invest in a relatively small number of securities. The Fund may invest in derivatives both for investment purposes and for efficient portfolio management. Derivatives may be used to create synthetic short positions in securities. The Fund may also invest in money market instruments, collective investment schemes, deposits, cash and near cash.

### **Type of Company**

VT Garraway Investment Funds ICVC is an investment company with variable capital incorporated in Great Britain, and having its head office in England, under registered number IC000935 and authorised and regulated by the Financial Conduct Authority ("FCA") with effect from 26 March 2012 (FCA Product Reference Number 573884).

The Company is a "UCITS scheme" (a type of scheme referred to in the FCA Rules).

The Company is structured as an umbrella comprising a number of Funds. The assets of each Fund will be treated as separate from those of every other Fund and will be invested in accordance with the investment objective and investment policy applicable to that Fund. New Funds may be established from time to time by the ACD with the approval of the FCA and the agreement of the Depositary. If a new Fund is introduced, a new Prospectus will be prepared to set out the required information in relation to that Fund. The only Fund which has been established is VT Garraway UK Equity Market Fund.

You as a shareholder are not liable for the debts of the Company.

Authorised Corporate Director (ACD)	Valu-Trac Investment Management Limited from 1 Ju	ıly 2016.

### 6 month Market Commentary

Over the half year, the Fund rose 10.70% against a strong market move of 7.20%, placing it in first quartile positioning against its peer group. Over twelve months, the Fund rose 14.78% against an index return of 12.91%, maintaining its second quartile ranking. After a difficult final quarter in 2016, it is encouraging to see much improved momentum in relative returns.

Equity markets moved ahead over the period as the Trump tax bill made its way into law heralding a long term cut for corporations. Less helpful were the raised tensions with North Korea, resulting in significantly tougher UN sanctions. Equity markets remained resilient, however, with US and UK indices finishing at their highs for the year, supported by further evidence of robust global growth, as the IMF raised its forecasts for both 2017 and 2018. There was an increasing focus on inflation data, and the higher probability of rate rises both in the US and UK. Risk data remained very subdued, as it had over much of 2017, with VIX hitting a record low of 9.19.

The US economy maintained its momentum, with very strong employment, consumer, manufacturing and housing data, and CPI figures ahead of expectations, providing a backdrop for the expected 0.25% rate rise over December, the third such increase over 2017. Eurozone political worries focussed on the difficulties for Angela Merkel in creating a coalition with the support of the SDP, and the result of the Catalan regional parliament vote, with the separatists winning a majority. Economic data throughout the region continued to encourage, with Germany the main powerhouse. In a background of record business and economic confidence, Mario Draghi announced a scale back in QE from 60 billion euros per month to 30 billion euros in 2018, although still noted the need for a 'very substantial degree of monetary accommodation'.

In Japan, the call for a snap election by Shinzo Abe paid off, and he retained a two-thirds majority. Similar momentum was evident in the Japanese data, with their manufacturing boom supported by record exports. Very strong equity returns for the Nikkei reflected this optimism.

One critical ingredient for equity market momentum over 2017 has been China's ability to convincingly manage its transition towards a more serviced based economy. Strengthening manufacturing, consumer and industrial profit data provided a positive backdrop for the 19<sup>th</sup> Party Conference, characterised by its 'one belt, one road' (OBOR) policy. Domestic equity returns were muted as the authorities looked to curb market excesses, and clamp down on industrial pollution.

Oil prices moved up strongly over the period, with Brent finishing the year at \$67. The higher US rig count was offset by OPEC cuts, supply fears and geopolitical uncertainties. Material prices finished the year very positively, with copper strength

### INVESTMENT MANAGER'S REVIEW (Continued)

a particular feature, in contrast to iron ore retracing previous highs. Gold held onto some of its earlier gains. US, and Chinese 10-year bond yields rose over the period, although UK yields were lower at 1.20%, having peaked closer to 1.40% mid-year.

Closer to home, progress on Brexit arrangements, tortuously slow, was sufficiently constructive to allow EU leaders to agree to the 'next stage' and allow trade talks to begin. Much of the period under review was spent on tense negotiation over the Irish border issue, and assuaging domestic critics. Theresa May's position remained under scrutiny following a Party Conference fraught with issues, although the focus on housing was welcomed. While the UK Budget was accompanied by reduced growth forecasts out to 2021, there was additional support for housing, transport, the NHS, and the National Productivity Fund. UK economic news has remained quite mixed, with a focus on the pressures on the domestic consumer, as wage inflation still lags headline inflation. Mixed Christmas sales and subdued mortgage approvals reflected such restraint. However, in contrast to a rather gloomy IMF outlook for the UK, the year ended with very strong data on export growth, with UK factory orders at their best for thirty years and a pickup in UK business confidence. UK equity markets finished through highs of the year with small cap returns a stand out feature, albeit weighted to the first half.

### **Fund Commentary**

Significant positive contributions came from our position in Wizz Air Holdings, as it expanded its low cost franchise, our overweight position in energy, supported by a rising oil price, and our material stocks, Anglo American and Glencore. We benefited from the bid by First Rand Group for the challenger bank Aldermore Group, and the appetite for exposure to emerging market debt through our holding in Ashmore Group. Mortgage Advice Bureau also added value, expanding market share while being generous in its distribution policy. Ashtead Group continued to add value, a beneficiary of a very strong US economy. Being underweight GlaxoSmithKline was also a positive.

Less helpful was our position in Ultra Electronics Holdings, suffering margin pressure and the loss of its CEO; we sold the remainder of our stock. Hurricane Energy lost initial momentum, despite the grant of significant production licences, and we have since sold the shares. Not owning BHP Billiton also detracted from returns. Barclays failed to deliver consistency in its earnings mix, disappointing the market. We no longer own the shares. In a period that witnessed some sector rotation, not owning British American Tobacco was a negative.

Adding to our domestic earnings, new positions included Lloyds Banking Group, and Royal Bank of Scotland, where the pace of restructuring is being matched by earnings progression. We built up positions in the telecom sector, through Vodafone Group and BT Group. We also added Kaz Minerals, enjoying higher grades in its copper assets than initially expected, with further expansion opportunities. Rio Tinto was added, with its substantially improved cash flow, and its plans to sweat its world-class assets while maintaining recent capital discipline. We established two new shorts, and closed our exposure to Ocado Group before its significant rally.

Further sales included UBM on deteriorating momentum, and our small residual holding of GlaxoSmithKline, avoiding the worst of the fall on poor figures. We sold our last precious metals holding, Fresnillo, and Arrow Global Group, concerned over its pace of acquisitions. The insurer, Lancashire Holdings was sold, impacted by deteriorating news around the likely impact of insurance claims related to the hurricane devastation.

### Outlook

With increased volatility evident in all markets, it has been encouraging to see the portfolio holding up relatively well. As the strength of the US economy stokes concern that the pace of rate rises might increase, global equity markets are likely to remain fragile in the short term. However, economic data more broadly, in both the US and Europe, points to an acceleration in growth, and a robust backdrop for corporate earnings. Amid almost universal gloom over the impact and outcome of Brexit, and significant pressure on the UK consumer, much of the economy is still prospering, as we continue to benefit from the uptick in global growth, and its impact on a number of sectors. The backdrop for our bias towards materials, energy and financials, put in place towards the end of 2016, remains intact, if not gaining momentum. We continue to test our underweights, and look for selective opportunities to short, but the portfolio remains much as it was at the year-end.

### PERFORMANCE RECORD (Continued)

- 1. The operating charges per unit figure is calculated by applying the operating charges percentage to the average net asset valuation per share throughout the period.
- The operating charges percentage is based on the expenses incurred during the period annualised, as a proportion of the average net asset value of the fund.

### Risk and reward profile

The Synthetic Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund.

The Fund is ranked as a '4' on a scale of 1-7. The Fund is in a higher category because daily historical performance data indicates that it has experienced average rises and falls in market prices historically. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment. The Fund indicator reduced from a '5' during the period.

The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to the future.

Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. This is usually a greater risk for bonds that produce a higher level of income. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value.

Where the Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of the Fund.

Where investments are made in smaller company shares, these may be riskier as they can be more difficult to buy and sell. Their share prices may also move up and down more than larger companies.

Investments in emerging markets may involve greater risks due to political and economic instability and underdeveloped markets and systems. This means your money may be at greater risk of loss.

The Fund is entitled to use derivative instruments for efficient portfolio management. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund.

The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.

For further information please refer to the Key Investor Information Document ("KIID").

For full details on risk factors for the Fund, please refer to the Prospectus.

# STATEMENT OF THE AUTHORISED CORPORATE DIRECTOR'S (ACD'S) RESPONSIBILITIES

The rules of the Financial Conduct Authority's Collective Investment Schemes Sourcebook require the Authorised Corporate Director to prepare financial statements for each accounting period which give a true and fair view of the financial position of the Company at the end of the financial period and its net revenues and net capital gains/losses for the period. In preparing these financial statements the Authorised Corporate Director is required to:

- comply with the Prospectus, the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014, the Instrument of Incorporation, generally accepted accounting principles and applicable accounting standards, subject to any material departures which are required to be disclosed and explained in the financial statements;
- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- prepare the financial statements on a going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future;

The Authorised Corporate Director is required to keep proper accounting records and to manage the Company in accordance with the COLL regulations, the Instrument of Incorporation, and the Prospectus. The Authorised Corporate Director is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

### DIRECTOR'S STATEMENT

Date .....

In accordance with the requirements of the Financial Conduct Authority's Collective Investment Scheme's Sourcebook, we hereby certify the interim report.

Anne A. Laing CA

Neil J. Smith MA BA CA

Valu-Trac Investment Management Limited Authorised Corporate Director

### For the 6 months to 31 December 2017

	Six months to 31.12.17		Six months to 31.12.16	
	£	£	£	£
Income Net capital gains/(losses)		5,533,670		424,000
Revenue	1,026,831		995,219	
Expenses	(279,321)		(328,135)	
Finance costs: Interest	(54)		(50)	
Net revenue before taxation	747,456	-	667,034	
Taxation		-		
Net revenue after taxation		747,456		667,034

Net assets attributable to shareholders		58,075,806		64,785,529

### **Accounting Policies**

The accounting policies applied are consistent with those of the financial statements for the year ended 30 June 2017 and are described in those financial statements.

The financial statements have been prepared in accordance with the Statement of Recommended Practice ('SORP') for Authorised Funds issued by the Investment Association in May 2014.

### Distribution

Distributions of the revenue of the Company will be made to shareholders on or before 31 March each year and interim allocations of revenue on or before 30 June, 30 September and 31 December.

#### **Taxation**

The Company will pay no corporation tax on its profits for the year to 30 June 2016 and capital gains within the Company will not be taxed.

### **Individual shareholders**

Tax on distributions: Revenue distributed by an OEIC is paid net but individual shareholders resident for tax purposes in the UK should generally be entitled to a tax credit equivalent to one ninth of the amount of the net distribution. Tax vouchers are sent to shareholders with each distribution and UK resident shareholders will be taxed on the total of the distribution and tax credit shown on the voucher. The credit will meet liability to basic rate tax but if the shareholder pays tax at the higher rate there will be a further liability. If the shareholder is not liable to income tax the amount of the tax credit cannot be reclaimed from HM Revenue and Customs. For payments made from April 2016 dividend tax credits were abolished.

Capital gains tax: Individual shareholders resident in the UK for tax purposes may be liable to capital gains tax on realisation of their shares as with other chargeable assets. The first £11,100 of gains each year are presently tax free for individuals. Gains in excess of that amount are charged at the rate of tax applicable to the individual tax payer.

### Debts of the ICVC fund

Unit holders of the ICVC are not liable for the debts of the ICVC.

### Issue and redemption of shares

Valu-Trac Investment Management Limited is the ACD and Registrar. Valu-Trac Investment Management Limited will receive requests for the purchase or sale of shares at any time during normal business hours. Instructions may be given by email to: <a href="mailto:garraway@valu-trac.com">garraway@valu-trac.com</a> or by sending an application form to the Registrar. Application forms are available from the Registrar.

The price of shares will be determined by reference to a valuation of the Company's net assets at 12:00 noon every Tuesday and the last business day of each month.

The ACD has the right to reject, on reasonable grounds relating to the circumstances of the applicant, any application for shares in whole or part, and in this event the ACD will return any money sent, or the balance of such monies, at the risk of the applicant. In addition the ACD may reject any application previously accepted in circumstances where the applicant has paid by cheque and that cheque subsequently fails to be cleared.

Any subscription monies remaining after a whole number of shares has been issued will not be returned to the applicant. Instead, smaller denomination shares will be issued in such circumstances.

A contract note giving details of the shares purchased and the price used will be issued by the Registrar by the end of the business day following the valuation point by reference to which the purchase price is determined. Settlement is due four business days after the trade date shown on the contract note and should be made to the ACD's dealing account.

Ownership of shares will be evidenced by an entry on the Company's Register of Shareholders. Certificates will not be issued. Statements in respect of periodic distributions of revenue will show the number of shares held by the recipient in respect of which the distribution is made. Individual statements of a shareholder's shares will also be issued at any time on request by the registered holder.

Where shares are redeemed, payment will be made not later than the close of business on the fourth business day following the next valuation point after receipt by the ACD of a request for redemption. The ACD may at its discretion accept redemptions lower than the minimum amount.

The most recent issue and redemption prices are available from the ACD.

### Pricing Basis

There is a single price for buying, selling and switching shares in a Sub-Fund which represents the net asset value of the Sub-Fund concerned. The share price is calculated on a forward pricing basis, that is at the next Valuation Point after the purchase or redemption is deemed to be accepted by the ACD.

The prices of shares are published daily on the Investment Association website at <a href="www.investmentuk.org">www.investmentuk.org</a>. Neither, the ACD nor the Company can be held responsible for any errors in the publication of the prices. The shares in the company will be issued and redeemed on a forward pricing basis which means that the price will not necessarily be the same as the published price.

## INFORMATION FOR INVESTORS (Continued)

### **Other Information**

The Instrument of Incorporation, Prospectus, Key Investor Information Document and the most recent interim and annual reports may be inspected free of charge at the office of the ACD which is also the Head Office of the Company and copies may be obtained upon application.
