

VT Munro Smart-Beta UK Fund

Previously the VT Maven Smart Dividend UK Fund

Factsheet 140: March 2019

Fund Objective

The Fund seeks to maximize the overall return by seeking to replicate the performance of the Freedom Smart-Beta UK Dividend Index¹. It is a UCITS fund.

Fund Process

The VT Munro Smart-Beta UK Fund will seek to deliver a consistent return over the long term by holding mainly large and medium sized securities, excluding Investment Trusts, listed on the London Stock Exchange. The Fund will be constructed on the basis of the underlying fundamental financial attributes of the companies listed on the London Stock Exchange rather on their market capitalisation. The weight of each company in the Fund will be determined by the proportion that its forecast total dividend will be expected to make of the total income of all the companies held. The Fund distributes every month and can be considered to be managed with the aim of replicating the performance of the Freedom Smart-Beta UK Dividend Index which is constructed on the same basis.

Market comment

(VT interpretation based on data from Reuters as at 28/02/2019)

February is when the majority of large UK companies report earnings for the previous year and declare final dividends. This means the index construction process rolls forward to incorporate the estimates for the next year. Dividends rose again last year so forecasts have also increased and is the main reason why the aggregate dividend forecast has increased over the month by 1% to £108.7 billion.

¹The Freedom Smart-Beta UK Dividend index is a Sterling based total return index, comprising approximately 300 of the largest dividend paying stocks (excluding Investment Trusts) that are quoted on the London Stock Exchange. While the full universe is initially determined by market capitalisation, the investible universe is reweighted based on expected dividend payout. The Fund aims to replicate the performance of the Freedom Smart-Beta UK Dividend index but will not necessarily be invested in all the constituents.

Distribution changed from semi-annual to quarterly in September 2013 and to monthly in October 2015.
