

VT Munro Smart-Beta UK Fund

Previously the VT Maven Smart Dividend UK Fund

Factsheet 148: November 2019

Fund Objective

The Fund seeks to maximize the overall return by seeking to replicate the performance of the Freedom Smart-Beta UK Dividend Index¹. It is a UCITS fund.

Fund Process

The VT Munro Smart-Beta UK Fund will seek to deliver a consistent return over the long term by holding mainly large and medium sized securities, excluding Investment Trusts, listed on the London Stock Exchange. The Fund will be constructed on the basis of the underlying fundamental financial attributes of the companies listed on the London Stock Exchange rather on their market capitalisation. The weight of each company in the Fund will be determined by the proportion that its forecast total dividend will be expected to make of the total income of all the companies held. The Fund distributes every month and can be considered to be managed with the aim of replicating the performance of the Freedom Smart-Beta UK Dividend Index which is constructed on the same basis.

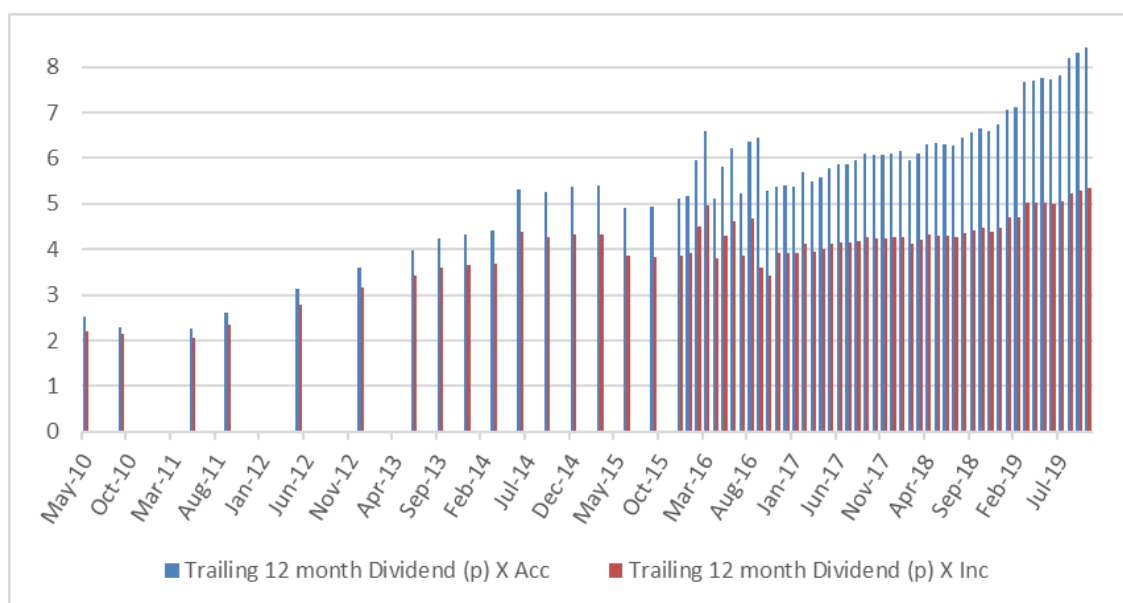

Market comment

(VT interpretation based on data from Reuters as at 31/10/2019)

A strong month for sterling, it rose 5.3% against the dollar, translated into a fall of 3.6% in the forecast of dividends to be paid next year to £109 billion. As might be expected the biggest cuts were in dollar based companies such as those in the oil, mining and international banking sectors. The spin-off of M&G from Prudential added £476m from the new company but reduced the forecast for the previous owner by £429m.

¹The Freedom Smart-Beta UK Dividend index is a Sterling based total return index, comprising approximately 300 of the largest dividend paying stocks (excluding Investment Trusts) that are quoted on the London Stock Exchange. While the full universe is initially determined by market capitalisation, the investible universe is reweighted based on expected dividend payout. The Fund aims to replicate the performance of the Freedom Smart-Beta UK Dividend index but will not necessarily be invested in all the constituents.

Distribution changed from semi-annual to quarterly in September 2013 and to monthly in October 2015.
