

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### VT LAMBDA Investment Fund (the "Fund") a sub-fund of VT Sorbus Vector Funds ICVC (the "Company") Class A – Income Shares (ISIN: GB00BKIX3861)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

#### Objectives and Investment Policy

The investment objective of the Fund is to provide a total return through a combination of capital growth and income over the long term (5 years +). Capital is in fact at risk and there is no guarantee that a positive return will be achieved over a 5 year, or any, period.

The Fund will aim to meet its objectives primarily (70% +) investing directly, or indirectly via collective investment schemes and ETFs, in a diversified portfolio of equities and bonds. The allocation between direct and indirect exposure to such asset classes will vary depending on the manager's assessment as to the appropriate asset mix based on market conditions and at times the level of indirect exposure may be high. There will also be exposure indirectly to various other asset classes including property and alternative assets such as commodities.

The Fund may also invest in other transferable securities, collective investment schemes (including those managed or operated by the ACD, including other sub-funds of the Company), money market instruments, deposits, cash and near cash.

The Fund will not have any particular industry or economic sector focus and as such weightings in these may vary as required.

Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) are held only for efficient portfolio management purposes.

There is no benchmark for the Fund but investors can assess the performance of the Fund through considering whether the value of their investment has increased, as well as them having received income, over the long term.

The Fund will be actively managed.

You can buy and sell shares in the Fund on any business day.

Income from the Fund will be added to the value of your investment.

The Fund may be suitable for investors who are willing to invest over the longer term (5 years).

For full investment objectives and policy details please refer to the prospectus.

#### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower risk ← Higher risk  
Typically lower rewards      Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 4 because simulated monthly historical performance data indicates that it has experienced average rises and falls in market prices historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.
- Risk from use of derivatives: Use of derivatives may result in gains or losses that are greater than the original amount invested.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

## Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5%
Exit charge	5%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial advisor about this.

Charges taken from the fund over a year	
Ongoing charges	1.88%

Charges taken from the fund under certain specific conditions	
Performance fee	None

As the Fund is only to launch on 1 July 2019, the ongoing charges figure shown here is an estimate of the charges and may vary from year to year. It excludes portfolio transaction costs. The Funds annual report for each financial year will include detail on the exact charges made.

You may also be charged a dilution levy on entry to or exit from the fund.

For more information about charges, please see sections 3.6 & 7 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

## Past Performance

**Past performance is not a guide to future performance.**

The share class and Fund were both launched on 1 July 2019. Accordingly, there is insufficient data to provide a useful indication of past performance to investors.

Performance is calculated in Pound Sterling.
