

Non-UCITS Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Tatton Blended Active Fund (the "Fund") a sub-fund of VT Tatton Oak ICVC (the "Company") Class A Accumulation Shares (ISIN: GB00BFFXRK73) Class A Income Shares (ISIN: GB00BFFXRL80)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The Fund aims to generate a growth based return over the longer term (10+ years).

The Fund will seek to achieve its investment objective by investing in a blend of actively managed and passively index tracking collective investment schemes such as unit trusts, OEICs and other UCITS funds and closed ended schemes but at times may also invest in individual stocks and bonds where this is deemed to lower the overall cost of investment while maintaining a high level of portfolio diversification.

Through these investments, the Fund will seek a UK and international equities orientated investment exposure with diversification achieved through investments in fixed interest and other asset classes, such as absolute return focused investment strategies and alternative asset classes, such as property and at times commodities. Foreign currency exposure through non-UK investments may be hedged back into £-Sterling.

This diversified portfolio of investments should aid in reducing short term fluctuations in value i.e. in achieving the fund's return objective with reduced volatility of shorter term returns, when compared to a mixed UK and Global equity fund.

The Fund may also invest, at the ACD's discretion, in other transferable securities, money market instruments, cash and near cash, deposits.

The Fund may use derivatives for the purposes of efficient portfolio management.

You can buy and sell shares in the Fund on any business day.

If you hold income shares any income from the Fund may be paid out to you.

If you hold accumulation shares, any income from the Fund will be re-invested to grow the value of your investment.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower risk ← Higher risk
Typically lower rewards Typically higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 4 because monthly historical performance data indicates that average rises and falls in prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Liquidity Risk:** adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- **Derivatives Risk:** use of derivatives may result in gains or losses that are greater than the original amount invested.
- **Exchange Traded Funds:** The Fund may invest in exchange traded funds. Exchange traded funds represent a basket of assets and derivatives contracts that may be traded on an exchange and may not necessarily trade at the net asset value of their underlying holdings. As a result they may trade at a price that is above or below the value of the underlying portfolio.
