

# Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## VT AJ Bell Responsible Screened Growth (the “Fund”) a sub-fund of VT AJ Bell ICVC (the “Company”)

Class I – Income Shares (ISIN: GB00BN0S2W00)  
Class I – Accumulation Shares (ISIN: GB00BN0S2V92)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited.

### Objectives and Investment Policy

The investment objective of VT AJ Bell Responsible Screened Growth is to achieve capital growth over the long-term (5 years) through investment in assets screened for consistency with a responsible strategy. Capital is in fact at risk and there is no guarantee that capital growth will be achieved over a 5 year, or any, period.

The Fund will seek to achieve its objective by investing at least 80%, in index-tracking investments and which consist of collective investment schemes (including those managed or operated by the ACD).

The indexes which the investments of the Fund will track will be those that have adopted the MSCI SRI methodology in their construction. The Investment Manager considers the MSCI SRI methodology to incorporate environmental, social and governance considerations and more specifically applies:

- (i) value based exclusions (and so exclude investments with material revenue exposure (more than 15%) to the manufacture or supply of weapons; thermal coal-mining and unconventional extraction of oil, gas and consumable fuels; thermal coal-based power generation; nuclear power, the sale or manufacture of tobacco; gambling; alcohol; adult entertainment; genetically modified organisms; and
- (ii) ‘norms based screening’ to remove companies from the investment universe which do not meet minimum standards of business practices and receive a minimum ESG rating of ‘A’ from the identified ratings agency (i.e. MSCI).

The Fund may also invest (up to 20%) in the following (in respect of which the ‘responsible’ filters noted above may not apply): non-index tracking collective investment schemes (including those managed and/ or advised by the ACD or Investment Manager), equities, bonds, money market instruments, deposits, cash and near cash.

Save as noted above (with a focus on responsible investment) the Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required. The Fund may have exposure to emerging markets (those markets whose economies are in an emerging growth phase and offer higher potential return with higher risks than developed market countries) through its investments in e.g. collective investment schemes or futures.

Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) are held only for efficient portfolio management purposes.

You can buy and sell shares in the Fund on any business day.

If you hold accumulation shares, income from the Fund will be added to the value of your investment.

If you hold income shares, any income from the Fund will be distributed on a semi-annual basis.

The Fund may be suitable for investors who are willing to invest over the longer term (5 years).

For full investment objectives and policy details please refer to the prospectus.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Historical data may not be a reliable indicator of the Fund’s future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean “risk free”.

The Fund is ranked 4 because monthly historical performance data indicates that it has experienced averages rises and falls in market prices historically. The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.
- Risk from use of derivatives: Use of derivatives may result in gains or losses that are greater than the original amount invested.

For full details of the Fund’s risks, please see the prospectus which may be obtained from the address in ‘Practical Information’ overleaf.
