

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Argonaut Equity Income Fund (the "Fund")

Class R Accumulation Shares (ISIN: GB00BDSFHH38)

Class R Income Shares (ISIN: GB00BDSFHG21)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The Fund aims to provide an income (net of fees) in excess of the yield of the European market (as represented by the IA Europe ex UK sector) with capital growth over any 5 year calendar period.

The Fund will invest in a concentrated portfolio of approximately 30-60 stocks. The Fund will invest predominantly in securities of companies incorporated in Europe (including up to 5% in UK companies).

The Fund may also invest in companies that are headquartered or quoted outside Europe which derive a significant part of their business from Europe and whose securities are listed or traded on an eligible securities or derivatives exchange. The Fund may also invest in emerging European markets including Russia and Eastern Europe.

The Fund is not constrained by any index weightings and will not concentrate on any particular country, sector or market capitalisation.

To aid liquidity, the Fund also has the ability to invest in assets such as American Depositary Receipts and Global Depositary Receipts.

The Fund may also invest in other transferable securities, units in collective investment schemes, money market instruments and deposits.

The Fund may make use of derivatives and forward transactions for the purposes of investment and for efficient portfolio management, including the use of hedging techniques and stock lending.

Save as noted above, the Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required.

The Fund aims to provide an income (net of fees) in excess of the yield of the IA (Investment Association's) Europe ex UK sector with capital growth over any 5 year calendar period. The Europe ex UK sector is therefore a target benchmark against which the performance of the Fund has been set.

The Fund will be actively managed.

If you hold accumulation shares, income from the Fund will be added to the value of your investment (i.e. dividend income will be included in the value of your shares).

If you hold income shares, any income from the Fund will be distributed four times a year.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 6 because historical performance data indicates that significant rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Liquidity Risk:** adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- **Derivatives risk:** use of derivatives may result in gains or losses that are greater than the original amount invested

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial advisor about this.

Charges taken from the fund over a year	
Ongoing charges	0.85%*

Charges taken from the fund under certain specific conditions
