

WHY THIS FUND?

1. The fund provides a broadly diversified allocation to Bonds (fixed income) exposure
2. An actively managed approach diversified across credit qualities and terms
3. The fund is constructed highly liquid funds to minimise security-specific risks

INVESTMENT OBJECTIVE

The objective of the Fund is to achieve an income with the potential for capital growth (net of fund costs) over the medium-term (rolling 5- year periods).

INVESTMENT POLICY

The Fund aims to achieve its objective predominantly (at least 80%) through exposure (directly and/or indirectly) to bonds (which are fixed income paying debt securities typically issued by companies and governments which have an obligation to pay regular interest income as well as repay the original capital to the investor at the bond's maturity).

The Fund may have exposure to investment grade bonds (where the issuer has a higher capacity to repay the debt), as well as sub investment grade bonds (where the issuer has a lower capacity to repay the debt, but typically pays a higher rate of interest).

The Fund can gain this exposure directly through holding bonds, or indirectly through investing in shares or units in other funds (including both actively managed and index-tracking bond funds), exchange traded funds and investment trusts. This may include investment in other funds managed by the Authorised Corporate Director, Investment Manager or its sub-advisors.

The Fund may also have direct or indirect exposure to other assets (i.e. money market instruments, deposits, cash and near cash) for portfolio construction, risk control or liquidity management purposes. The Fund is actively managed which means the Investment Manager decides which investments to buy or sell and when. Investments can cover a range of global markets, however foreign currency exposure may be hedged back to sterling either directly or by using sterling-hedged share classes in other funds.

The Fund can use derivatives or forward transactions (instruments whose returns are linked to another asset, market, index or other variable factor), for efficient portfolio management purposes including the reduction of risk (hedging).

The Fund may hold up to 20% in cash to enable the settlement of liabilities redemptions, for active asset allocation purposes and for the efficient liquidity management of the Fund.
