

VT Cantab Balanced Fund 'C' Class

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Cantab Balanced Fund (the "Fund") a sub-fund of VT Cantab Funds ICVC (the "Company") C Accumulation Shares (ISIN: GBO0BG211654) C Income Shares (ISIN: GBO0BG211548)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The investment objective of the Fund is to provide income and capital growth over the medium term (3-5 years).

The Fund aims to achieve its objective by investing at least 80% in collective investment funds (which may include those managed and/or operated by the ACD) which provide exposure to a diversified portfolio of investments, including equities, bonds and alternative assets (such as commodities, property and infrastructure). It is expected that the exposure to equities will typically be between 50% and 85%.

The Fund may also invest directly in equities, fixed income, money market instruments, deposits, cash and near cash.

Derivatives (that is sophisticated investments linked to the rise and fall of one or more underlying assets) may be used for efficient portfolio management purposes (although derivative use is expected to be limited).

The Fund has no particular emphasis on any geographical areas or any industrial or economic sector.

The Fund will be actively managed.

In constructing the portfolio an assessment of the overall risk on a scale of 0 (ultra-cautious) to 10 (very risky) is undertaken. On this scale, the Fund is expected to be 6 given a preference towards higher risk assets such as equities as compared with lower risk assets such as cash and fixed income. This is an internal score by the investment manager and is separate from the score shown in the Risk and Reward profile in this document.

You can buy and sell shares in the Fund on any business day.

If you hold accumulation shares, income from the Fund will be added to the value of your investment.

If you hold income shares, any income from the Fund will be distributed twice a year.

The Fund may be suitable for investors who are willing to invest over the medium to long term (5 years).

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

← Lower Risk			Higher Risk →			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 4 because monthly historical performance data indicates that average rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial advisor about this.

Charges taken from the fund over a year	
Ongoing Charges	0.74%

Charges taken from the fund under specific conditions	
Performance Fee	N/A

The ongoing charges figure is based on expenses and the net asset value as at 15 May 2026. This figure may vary from year to year. It excludes portfolio transaction costs. The Funds annual report for each financial year will include detail on the exact charges made.

You may also be charged a dilution levy on entry to or exit from the fund.

For more information about charges, please see sections 3.6 & 7 of the prospectus, together with Appendix 1 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

Past Performance

VT Cantab Balanced C Accumulation

Past performance is not a guide to future performance.

Past performance is not a guide to future performance.

The past performance in the chart shown opposite is inclusive of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.

The share class and Fund both launched on 3 September 2018.

Performance is calculated in Pound Sterling.
