This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

The VT De Lisle America Fund (“the Fund”) a sub-fund of The Mulben Investment Funds (“the Company”) Class B GBP Net Accumulation (ISIN: GB00B3QF3G69)

The Fund is an Open Ended Investment Company. De Lisle Partners LLP is the Investment Manager and Valu-Trac Investment Management Ltd is the Authorised Corporate Director of the fund.

Objectives and Investment Policy

The Fund will aim to achieve capital growth over the long term (5 years).

The Fund will seek to achieve its objective by investing at least 80% in securities (typically common stock, American Depositary Receipts and exchange traded funds) listed on North American (US or Canadian) exchanges.

In addition to investing directly in North American listed securities, the Fund may also invest in other transferable securities (bonds and non-US listed equities and or bonds), collective investment schemes (including those managed and/or operated by the ACD or Investment Manager), money market instruments, deposits, cash and near cash.

There is no particular emphasis on any industrial or economic sector.

Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) may be used for efficient portfolio management purposes including hedging (although it is expected that use of derivatives will be limited). The Fund has the discretion to invest in a range of investments as described above.

Any income the Fund generates will be reinvested to grow the value of your investment. You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

← Lower Risk			Higher Risk →			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

The Fund is ranked 6 because funds of this type have experienced significant rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The lowest category does not mean “risk free”.

The indicator does not take into account the following risks of investing in this Fund:

The Fund may invest in cash and cash equivalent securities to try to protect its value in times of market uncertainty, but this may not always be successful.

Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may reduce the value of your investment.

Investing in other open ended collective investment schemes may expose investors to increased risk due to restrictions on withdrawals, less strict regulations and use of derivatives.
