

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Discovery Managed Growth Fund (the "Fund")

a sub-fund of The Discovery Fund (the "Company")

Class C Sterling Net Accumulation Shares (ISIN: GB00BYN66713)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The objective of the Fund is to provide capital growth whilst being managed so as to remain, over a market cycle, within a defined volatility range.

The Fund will primarily gain exposure indirectly via eligible collective investment schemes and other collective investment vehicles (for example, investment companies, exchange traded funds) to a range of eligible assets such as transferable securities (shares (including investment trusts), debentures, government and public securities, warrants or certificates representing certain securities), money market instruments, deposits, cash, property and commodities) to provide diversification. The Fund may also invest directly in such eligible assets (excluding property and commodities).

There will be no particular emphasis on any industrial, geographic or economic sector.

Derivatives will be used only for the purpose of Efficient Portfolio Management.

The Fund will seek to remain within a defined volatility range over a market cycle – it will aim to be positioned as a 5 on a risk scale of 1- 10 (with 1 being the lowest risk and 10 being the highest risk). For this purpose, a market cycle is expected to be a minimum 5-year period. Risk profile ratings will be calculated by an independent third party.

Remaining within the volatility range will take precedence over the other objectives of the Fund, although the Investment Manager may in exceptional circumstances operate outside this range where it considers it is in the best interest of shareholders.

Typically, the Fund is likely to have greater exposure to underlying equities and commodities, and less exposure to underlying cash, fixed interest and property assets, than other funds in the range.

Investors can redeem shares on demand, at the daily valuation point of 12 noon (UK time) when this is a normal business day in the UK.

The Fund is not managed to generate an income. For accumulation shares, any income received is reflected in the price of the shares.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower risk ← Higher risk
 ← Typically lower rewards Typically higher rewards →

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The fund has been classed as 5 because its volatility has been measured as relatively high.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial advisor about this.

Charges taken from the fund over a year	
Ongoing charges	0.80%*

Charges taken from the fund under certain specific conditions	
Performance fee	N/A

The ongoing charges figure is based on expenses and the net asset value as at 19 March 2020. This figure may vary from year to year. All of the ongoing charges are taken from the income of the Fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking. They include charges for the operation and management of the fund

You may also be charged a dilution levy on entry to or exit from the fund.

The Fund's annual report for each financial year will include detail on the exact charges made.

For more information about charges, please see sections 3.6 & 7 of the prospectus, together with Appendix 1 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

**The Investment Adviser of the Fund has undertaken to absorb any costs that would otherwise cause the Fund to have ongoing charges in excess of 0.8%.*
