VT Downing Listed Infrastructure Income Fund (the "Fund") a sub-fund of VT Downing Investor Funds ICVC (the "Company") Class B Accumulation Shares (ISIN: GB00BMDVYR80) Class B Income Shares (ISIN: GB00BMDVYS97)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The investment objective of the Fund is to generate income and preserve capital with potential for capital growth, all over the long term (5 years).

The Fund's will seek to achieve its objective by investing at least 80% in a concentrated portfolio of infrastructure and infrastructure related companies (including, but not limited to, those whose primary activity or exposure is in the UK transport, healthcare, utilities, communication, and renewable energy infrastructure sector which are listed in the United Kingdom (including REITS). The Fund will have a specific focus on investments denominated in Sterling, which are themselves invested in Sterling assets and which have most or all of their activities within the UK.

It is expected that the market capitalisation (i.e. value) of companies within the Fund's portfolio will vary with the Investment Manager trying to ensure there is a spread between larger and smaller companies at all times.

In addition to investing in equities, the Fund may also invest in other transferable securities (i.e. including those which do not have an infrastructure focus), bonds, collective investment schemes, money market instruments, deposits, cash and near cash.

The Fund may hold derivatives for Efficient Portfolio Management purposes (including hedging). It is not intended that the use of derivatives for EPM purposes will increase the risk profile of the Fund.

You can buy and sell shares in the Fund on any business day.

If you hold accumulation shares, income from the Fund will be added to the value of your investment (i.e. dividend income will be included in the value of your shares).

If you hold income shares, any income from the Fund will be distributed quarterly.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower Risk				Higher Risk			
←				→			
Typically lower rewards				Typically higher rewards			
1	2	3	4	5	6	7	

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 4 because simulated monthly historical performance data indicates that average rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Liquidity Risk:** adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- **Concentration Risk:** This Fund holds a limited number of investments and is focussed on a particular sector (infrastructure). If a particular investment and/or the infrastructure sector generally falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments (and/or it invested in a more diverse range of sectors).

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in `Practical Information` overleaf.
