

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Elston Liquid Real Assets Index Fund (the "Fund")

a sub-fund of VT Portfolio Solutions ICVC (the "Company")

Class A Accumulation Shares (ISIN: GB00BLB58C88)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The investment objective of the Fund is to track the performance (before fund fees and expenses) of the Elston Liquid Real Assets Index¹.

The Fund will invest in a diverse range of instruments, predominantly (80%+) in index-tracking Exchange Traded Funds Products in the same proportion as the Benchmark Index. However, there may be times when the Fund will not replicate the Benchmark Index due to portfolio construction constraints (i.e. the proportion of the fund invested in certain assets may need to vary from that of the Benchmark Index to ensure compliance with UCITS rules); turnover constraints (where the manager considers it is in the best interests of investors not to change the holdings of assets to track the index); and liquidity management considerations (which may mean that the Fund holds some cash which the Benchmark Index may not to ensure adequate liquidity).

As the Fund seeks to track the performance of the Benchmark Index (before fund fees and expenses) it is heavily influenced by the Benchmark Index with weightings of the Fund being continuously compared to the weightings of the Benchmark Index, and a tracking error will be targeted of <3%.

The Fund may also invest in equities, fixed income, collective investment schemes (including those managed and/or operated by the ACD), money market instruments, deposits, cash and near cash.

The Fund is passively managed.

The Fund may hold derivatives for Efficient Portfolio Management purposes (including hedging) (although such use is expected to be limited). It is not intended that the use of derivatives for EPM purposes will increase the risk profile of the Fund. The Fund may invest in other collective investment schemes which may themselves use derivatives for investment purposes.

Save as noted above, the Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required.

You can buy and sell shares in the Fund on any business day.

Income from the Fund will be added to the value of your investment (i.e. dividend income will be included in the value of your shares).

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower risk			Higher risk			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 4 because monthly historical performance data indicates that average rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Liquidity Risk:** adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- **Derivatives risk:** use of derivatives may result in gains or losses that are greater than the original amount invested

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

¹ The Elston Liquid Real Assets Index uses a strategic weighting scheme to allocate across a diverse range of liquid instruments representing real asset classes, such as listed property securities, listed infrastructure securities, asset-backed securities, natural resources, gold, commodity baskets, as well as other instruments that are directly or indirectly inflation-linked. Further information on the composition of the index can be found at: <https://www.elstonsolutions.co.uk/our-indices.html>

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial advisor about this.

Charges taken from the fund over a year	
Ongoing charges	0.74%*

Charges taken from the fund under certain specific conditions	
Performance fee	N/A

The ongoing charges figure is based on expenses and the net asset value as at 30 June 2025. This figure may vary from year to year. It excludes portfolio transaction costs. The Funds annual report for each financial year will include detail on the exact charges made.

You may also be charged a dilution levy on entry to or exit from the fund.

For more information about charges, please see sections 3.6 & 7 of the prospectus, together with Appendix 1 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

*The Investment Manager of the Fund has undertaken to absorb any costs that would otherwise cause the Fund to have ongoing charges in excess of 0.74%. In the absence of such commitment the ongoing charges figure would be 1.33%.

Past Performance

Past performance is not a guide to future performance.

The past performance in the chart shown opposite is inclusive of tax and charges, but excludes the entry charge that may be paid on the purchase of an investment.

The share class and Fund both launched in November 2021.

Fund: Class A Accumulation Shares
Benchmark: Elston Liquid Real Assets Index

Performance is calculated in Pound Sterling.
