The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

It is intended that the Fund will be a PAIF at all times, and, as such, its investment objective is to carry on Property Investment Business and to manage cash raised for investment in the Property Investment Business. In so doing the objective of the Fund is to preserve capital through market cycles (7 years) with the potential for capital growth, whilst delivering a regular income.

The Fund seeks to achieve its objective primarily (70% +) by investing in a diversified portfolio of real estate investment trusts ("REITs") listed on the London Stock Exchange with minimal exposure to retail property assets.

In addition to investing in REITs the Fund may also invest in other transferable securities, bonds, collective investment schemes, transferable securities, money market instruments, deposits, cash and near cash.

Save as noted above, there is no particular emphasis on any geographical area or industry or economic sector.

The Fund will be actively managed.

Save as noted above, the Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required.

Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) may be used for efficient portfolio management purposes.

The Fund does not have a specific benchmark. The performance of the Fund can be measured by considering whether the objective is achieved (i.e. whether a regular income is provided and there is any capital growth over a market cycle).

You can buy and sell shares in the Fund on any business day.

If you hold accumulation shares, income from the Fund will be added to the value of your investment.

If you hold income shares, any income from the Fund will be distributed every three months.

[The Fund may be suitable for investors who are willing to invest over the medium to longer term (5 years).]

For full investment objectives and policy details please refer to the prospectus.

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 5 because monthly historical performance data indicates that relatively high rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- Derivatives risk: use of derivatives may result in gains or losses that are greater than the original amount invested

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.
