

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Grosvenor Adventurous Fund ("the Fund")

A Accumulation Retail Shares

The Fund is a Sub-Fund of VT Grosvenor Funds ICVC. The Fund is an Open Ended Investment Company. ISIN: GB00BYZCNT84

Valu-Trac Investment Management Limited is the Authorised Corporate Director of the Fund.

Objectives and investment policy

The fund aims to generate capital growth principally from equity markets. The fund has an annualised target volatility of 12.5%. The fund's primary objective is to control volatility and this could therefore be at the expense of performance. There can be no guarantee that the fund will achieve its objective of managing volatility. Capital is in fact at risk, and there is no guarantee that the investment objective will be achieved.

In order to meet its objective, the fund will be actively managed and significantly exposed to UK and international equity investments by primarily investing in collective investment schemes, and may also invest directly in other transferable securities, money market instruments, cash and near cash. The fund will also invest in high yield bonds and alternatives, exposure to such assets will not exceed 35% of the Net Asset Value of the fund. The composition of the portfolio will reflect the Investment Manager's view of the potential future return of different asset classes and specific investments.

The Investment Manager is able to invest the Fund's portfolio into derivatives, which are sophisticated investments that are linked to the rise and fall of prices of other assets. Derivatives will be used simply to reduce risk or manage the Fund more efficiently and may be used only for Efficient Portfolio Management (including hedging) in accordance with the FCA Rules.

Working in conjunction with the Investment Manager, a third party undertakes analysis of the volatility of the asset classes included in the strategic asset allocation to determine overall volatility based on 20 years back-testing. The modelling will be re-assessed each year to ensure that the strategic asset allocation is maintained in line with target volatility.

Any income this share class generates will be re-invested to grow the value of your investment. You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

- The Fund is ranked 5 because funds of this type have experienced relatively high rises and falls in market prices historically. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The lowest category does not mean "risk free".

The indicator does not take into account the following risks of investing in this Fund:

- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- This Fund can use derivatives to protect from price and currency movement. This may result in gains or losses that are greater than the original amount invested.
- For further risk information please see the "Risk Factors" section of the prospectus.

<p>Charges</p> <p>The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.</p>	<ul style="list-style-type: none"> • The ongoing charges figure is based on expenses and the net asset value as at 29 January 2021. This figure may vary from year to year. It excludes portfolio transaction costs. The Funds annual report for each financial year will include detail on the exact charges made. • You may also be charged a dilution levy on entry to or exit from the Fund; this is to cover costs associated with your transaction. • For more information about charges, please see the prospectus.
<p>One-off charges taken before or after you invest</p>	
<p>Entry charge 0.00%</p>	
<p>Exit charge 0.00%</p>	
<p>These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your Investment. In some cases, you might pay less and you should speak to your financial adviser about this.</p>	
<p>Charges taken from the Fund over a year</p>	
<p>Ongoing charges 1.33%</p>	
<p>Charges taken from the Fund under specific conditions</p>	
<p>Performance fee NONE</p>
