

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## VT Highlight British Companies Fund (The "Fund") a sub-fund of VT Highlight ICVC (the "Company") A (£) Accumulation Shares (ISIN: GB00BJXS2B80) A (£) Income Shares (ISIN: GB00BJXS2968)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

### Objectives and Investment Policy

The investment objective of the Fund is to generate capital growth over the long term (5+ years) after deduction of fees.

The Fund is actively managed and will aim to meet its investment objective by investing at least 90% of its net asset value in a portfolio of equity instruments of companies that are domiciled, incorporated or have a significant part of their business in the UK and that are listed on recognised UK stock exchanges. The companies will fit the criteria of having either greater than 45% of their sales originating in the UK or greater than 2/3 of their assets based in the UK. The measurement of these criteria is based on the respective company's latest published annual report. In following these criteria, the Fund is investing in companies that are not only listed on UK based stock exchanges but are also closely linked to the UK economy.

The total number of stocks in the Fund's portfolio will typically be 20-30 but the Fund may at times have less or more stocks than this average range. The relatively concentrated portfolio means that the impact of a change in the price of an individual stock may be more pronounced and the fluctuation in the net asset value of the Fund larger than in a more diversified fund.

In addition to UK equity instruments, up to 10% of the Fund's net asset value may be invested in a range of other instruments, including fixed interest securities, money market instruments and deposits, cash and near cash instruments in sterling.

The Fund may invest in derivatives for the purposes of efficient portfolio management only.

If you hold accumulation shares, income from the Fund will be added to the value of your investment (i.e. dividend income will be included in the value of your shares).

If you hold income shares, any income from the Fund will be distributed on an annual basis.

The Fund may be suitable for investors who are willing to invest over the medium to longer term (5 years).

The performance of the Fund can be measured by considering whether the objective is achieved (i.e. whether there has been capital growth over the long term (at least 5 years)). The Fund's performance can also be compared to the performance of the IA UK All Companies Sector.

For full investment objectives and policy details please refer to the prospectus.

Note: Absolute return investing aims to produce a profit over time regardless of what the stock market does. Even when markets are falling, an absolute return fund can still make money, although this is never guaranteed.

### Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower Risk			Higher Risk			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 5 because monthly historical performance data indicates that relatively high rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty Risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Liquidity Risk:** adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- **Derivatives Risk:** use of derivatives may result in gains or losses that are greater than the original amount invested.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

## Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry Charge	None
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial advisor about this.

### Charges taken from the fund over a year

Ongoing Charges	1.20%
-----------------	-------

### Charges taken from the fund under specific conditions

Performance Fee	N/A
-----------------	-----

The ongoing charges figure is based on expenses and the net asset value as at 29 May 2026. This figure may vary from year to year. It excludes portfolio transaction costs. The Funds annual report for each financial year will include detail on the exact charges made.

A dilution adjustment may also be applied on entry to or exit from the Fund.

For more information about charges, please see sections 3.6 & 7 of the prospectus, together with Appendix 1 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

## Past Performance

VT Highlight British Companies Fund A Accumulation

### Past performance is not a guide to future performance.

The past performance in the chart shown opposite is inclusive of tax and charges.

The share class and Fund both launched on 1 July 2019.

Performance is calculated in Pound Sterling.

*Please note, the investment policy and name for the Fund changed on 1 May 2024.*

## Practical Information

The depositary for the Fund is The Bank of New York Mellon.
