

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT PortfolioMetrix Core Cautious Portfolio (the "Fund")
 a sub-fund of VT PortfolioMetrix Funds ICVC (the "Company")
 Class B Accumulation Shares (ISIN: GB00BTPFF416)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investments Policy

The investment objective of the Fund is to generate income and capital growth over the medium to long term (at least 5 years).

The Fund will seek to achieve its objectives by investing at least 80% in collective investment funds (such as OEICS, exchange traded funds and Investment Trusts, and which may include funds managed and/or operated by the ACD or Investment Manager) which will provide exposure to a diversified portfolio but with a majority (more than 50%) towards exposure (indirectly) to lower risk assets such as fixed interest investments (such as bonds, which may be government or corporate and vary in terms of investment grade credit ratings, including sub-investment grade to a limited extent) and less emphasis on exposure to higher risk assets such as equities (and to an even lesser extent, alternatives such as property, infrastructure and commodities). It is expected that the exposure to higher risk assets such as equities will typically be between 15-35%.

The Fund may also invest directly in equities, bonds (investment grade and sub-investment grade), money market instruments, cash, near cash and deposits. The Fund may use derivatives for the purposes of efficient portfolio management.

Foreign currency exposure through non-UK investments and particularly overseas bonds may be hedged back into £-Sterling.

The Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required.

The Fund is actively managed.

Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of one or more underlying assets) may be used for used for efficient portfolio management and hedging purposes.

Save as noted above, the Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required.

You can buy and sell shares in the Fund on any business day.

Income from the Fund will be added to the value of your investment (i.e. dividend income will be included in the value of your shares).

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 3 because monthly historical performance data indicates that low to medium rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- Concentration Risk: This Fund holds a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases, you may pay less and you should speak to your financial advisor about this.

Charges taken from the fund over a year

Ongoing charges	0.54%*
-----------------	--------

Charges taken from the fund under certain specific conditions

Performance fee	N/A
-----------------	-----

The ongoing charges figure is based on expenses and the estimated net asset value as at 17 April 2026. This figure may vary from year to year. It excludes portfolio transaction costs. The Funds annual report for each financial year will include detail on the exact charges made.

You may also be charged a dilution levy on entry to or exit from the fund.

For more information about charges, please see sections 3.6 & 7 of the prospectus, together with Appendix 1 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

*The ongoing charges figure is made up of:

- (i) The annual management charge payable to the ACD (currently 0.29% per annum)
- (ii) Other direct costs to the Fund (currently 0.03% per annum)
- (iii) The costs of the underlying CIS (net of any rebates paid back into the fund)

The manager, with agreement from the ACD, has committed to the costs noted in (i) and (iii) being equal to a total of 0.32%.

Past Performance

Past performance is not a guide to future performance.

The Fund launched on 30 December 2020. The share class launched on 8 July 2025.

Accordingly, there is insufficient data to provide past performance for the share class.

Performance is calculated in Pound Sterling.

Practical Information

The depositary for the Fund is The Bank of New York Mellon.
