

The VT Redlands Portfolios

What are the VT Redlands Portfolios?

The VT Redlands Portfolio funds each invest in one of four defined “asset classes” namely the Equity, Multi-Asset, Property and Fixed Income categories. Each fund carries a prescribed Risk Profile on a scale of 1 to 7 – with for example Equity being the highest at a factor 5. Each one is used as a building block in the creation of bespoke risk rated investment portfolios for clients of David Williams IFA.

By combining the four VT Redlands funds with other asset classes such as With Profits/ Smoothed Managed and Structured Equity funds, our clients can enjoy the benefits of a very wide level of diversification within their portfolios. This reduces volatility and creates the potential for rewarding rates of return year after year.

Each Portfolio fund is constructed as a Fund of Funds providing access to the “best of the best” sector funds from a huge investment universe. The Portfolios are designed to meet their objectives as efficiently as possible whilst keeping costs to a minimum and are run according to a strict risk-control criteria.

Typically, 15 to 25 different funds are held in each portfolio, with each one in turn managed by leading investment houses such as Baillie Gifford, Fidelity and Invesco as well as specialist boutiques including Ruffer, Fulcrum and Amati. Underlying funds have exposure to a great many shares, bonds and other assets, Therefore, a single investment into one of the Redlands Portfolios gives a spread across a myriad of different holdings, countries and investment styles.

To manage each fund and essentially pick the best funds to hold on a day to day basis we have selected Hawksmoor Investment Management, an award-winning independent specialist fund management group. Hawksmoor are then accountable to us for fund conduct and most crucially fund performance. The Hawksmoor team managing the fund was previously known as Wellian Investment Solutions, prior to their merger with Hawksmoor in March 2022.

What do Hawksmoor Investment Management do?

Hawksmoor are specialist Multi-Manager investors. They are experts in choosing fund managers who are likely to perform well, allowing funds to blend together to create a cohesive portfolio. It is our belief that no single fund management group has the top fund manager in every sector and as Multi-Managers Hawksmoor can cherry pick the very best talent from across every fund management group.

Why did we choose Hawksmoor Investment Management?

Many professional fund selectors use the “5 P” test as the basis for assessing a fund and fund manager. This analyses Performance, Process, Philosophy, Prosperity and People.

1. Performance

Ultimately, performance is the most important factor for most clients. The return achieved net of charges for a given level of risk is what matters most. Hawksmoor has delivered not just strong performance, but strong risk adjusted performance over the long term.

2. Process

A robust, repeatable process is vital to any investment management business. SEMAFOUR is Hawksmoor’s manager selection tool that analyses over 20,000 funds every month. It assesses onshore, offshore, active, passive, open and closed ended collective funds in the same unemotional way. No other fund of fund business that we know of has a process as powerful. PORTCULLIS is their risk analysis tool which they built in-house as they couldn’t find anything robust enough in the market. PORTCULLIS allows Hawksmoor to assess the impact that any change in the portfolio will have on overall volatility to create the ideal blend. Having used technology to narrow the field individual fund manager meetings are then essential in final selection to understand the “5 Ps” of the individual sub-funds chosen. Hawksmoor conduct hundreds of manager meetings each year.

3. Philosophy

Hawksmoor have a simple, clear philosophy. They don't believe in over-committing to any single asset class or investment. They don't believe in investing into illiquid areas or into things they don't understand. They do believe in the power of genuine diversification and go further than most managers in understanding diversification. They also spend a huge amount of time understanding the hidden risks within funds, fund managers and fund management businesses. They are believers in both passive investing (index tracking) and active investing (stock picking). They regard passive as an active choice and not just as a way of keeping costs down. In some markets, passive is not just cheaper but also better.

4. Prosperity

It was important that the manager we selected was established and well resourced. Hawksmoor Investment Management is a discretionary fund management firm, which has been authorised since 2007 and with over £2.7 bn of Assets Under Management.

5. People

People are the key to any successful investment solution. To measure the calibre of people at Hawksmoor we needed to look at their experience, knowledge, previous performance and how they all knitted together. Hawksmoor Investment Management is an award-winning team of Multi-Manager investors founded in 2007. The investment team has held the most senior investment roles in leading businesses such as Hargreaves Lansdown, Skandia, Foreign & Colonial and AXA Architas.

Richard Philbin is Chief Investment Officer of the Hawksmoor Investment Solutions division at Hawksmoor. He is one of the UK's best-known multi-manager investors and previously AA rated by OBSR, Citywire and S&P. He is also the inventor of the highly regarded and publicised 'Traffic Light Analysis' system of assessing funds. Prior to Hawksmoor and Wellian's merger, he was AXA Architas Multi Manager's Chief Investment Officer where he chaired the investment committee and helped the company go from a founding business to a top 5 player in the multi manager space in the UK with responsibility for assets of over £7 bn. Previously, Richard was Head of Multi Manager at F&C Investments. Whilst at F&C he launched the successful LifeStyle range of funds. Assets grew from £100m to over £1bn during his tenure.

Alan Durrant is Chief Investment Officer of the Hurst Point Group, owner of Hawksmoor. Previous roles for Alan were Group Chief Investment Officer at The National Bank of Abu Dhabi (NBAD) and prior to NBAD he was Head of Asset Management at Gulf Finance House. Before moving to the Middle East, Alan was Chief Investment Officer at Skandia Investment Management. During his tenure the firm won the Best Multi-Manager at the prestigious Money Marketing Awards in three consecutive years. Whilst at Skandia, Alan conceived and launched the popular Global Best Ideas and Asset Allocator ranges. Prior to Skandia, he was at Hargreaves Lansdown for 12 years, latterly as Investment Director.

Important Investment Notes

This document is for general information purposes only and does not take into account the specific investment objectives, financial situation or particular needs of any particular person. It is not a personal recommendation and it should not be regarded as a solicitation or an offer to buy or sell any securities or instruments mentioned in it. This document represents the views of David Williams IFA Ltd, Valu-Trac Investment Management Limited and Hawksmoor Investment Management Limited at the time of writing. It should not be construed as investment advice. Full details of the Redlands Funds, including risk warnings, are published in the Key Investor Information documents, the Supplementary Information document and Prospectus, available from www.valu-trac.com. The proportion of assets held, and the typical asset mix will change over time as the Fund aims, over the medium to long term, for investment risk to be controlled in line with the agreed volatility range. The Investment Manager will use a wide range of assets and asset classes to provide a diversified investment approach and will actively alter the weights of the component parts where necessary to stay within agreed boundaries. The Redlands Funds are subject to normal stock market fluctuations and other risks inherent in such investments. The value of your investment and the income derived from it can go down as well as up, and you may not get back the money you invested. Investments in overseas markets may be affected by changes in exchange rates, which could cause the value of your investment to increase or diminish. You should regard your investment as medium-to-long term. Past performance is not a reliable indicator of future results. Every effort is taken to ensure the accuracy of the data used in this document, but no warranties are given. Fund holding percentage figures may not add up to 100 due to rounding. The authorised corporate director of the Fund is Valu-Trac Investment Management Limited, authorised and regulated by the Financial Conduct Authority, registration number 145168. Hawksmoor Investment Management Limited is authorised and regulated by the Financial Conduct Authority, firm reference number 472929.

VT Redlands Equity Portfolio

February 2023

Investment Objective

The objective of the VT Redlands Equity Portfolio is to provide capital growth. The Fund seeks to achieve its objective primarily by investing in collective investment vehicles (including for example collective investment schemes, exchange traded funds and investment trusts) which provide exposure to listed equity securities across developed and emerging markets. The Fund may also invest in other collective investment schemes, transferable securities, money market instruments, deposits, cash and near cash. The Fund does not have a specific benchmark. However, the performance of the Fund can be assessed by considering whether the objective for capital growth over the long term is achieved. There is no particular emphasis on any geographical area or industry sector.

Commentary

With the removal of a fund which invests in UK stocks (Liontrust Special Situations) in February and the proceeds predominantly going back into the existing UK funds and no new investments introduced to the portfolio, the VT Redlands Equity fund now contains twenty-four holdings.

The majority of the holdings in the fund outperformed their peer group on a relative basis.

The geographical asset allocation of the fund barely changed over the month, with just marginal increases to US and European equity exposure. But no regional weighting increased or declined by more than 0.5%. Flows of cash into the fund and dealing changes left the cash allocation up slightly at the end of the month.

VT Redlands Multi-Asset Portfolio

February 2023

Investment Objective

The objective of the VT Redlands Multi-Asset Portfolio is to provide capital growth. The Fund seeks to achieve its objective primarily by investing in collective investment vehicles (including for example collective investment schemes, exchange traded funds and investment trusts) which provide exposure to various different asset classes including equities, fixed income securities and assets having absolute return strategies. The Fund may also invest in other collective investment schemes, transferable securities, money market instruments, deposits, cash and near cash. The Fund does not have a specific benchmark. However, the performance of the Fund can be assessed by considering whether the objective for capital growth over the long term is achieved. There is no particular emphasis on any geographical area or industry or economic sector.

Commentary

Portfolio activity was muted in February as the capital markets continued to adjust to higher interest rates and seemingly persistent inflation. There were no changes over the month to the thirty diversified holdings though.

Turning to portfolio activity, cash on account was allowed to rise by approximately half a percentage point and the allocation to infrastructure assets was added to, taking advantage of short-term price weakness. Elsewhere, the fund switched about 75bp (3/4 of one percent) into the long-held Latitude Horizon at the expense of Trojan (another long-held position). The former now accounts for about 4.50% and the latter 2.00%.

VT Redlands Property Portfolio

February 2023

Investment Objective

The investment objective of VT Redlands Property Portfolio is to generate capital growth over the long term. The Fund seeks to achieve its objective primarily by investing in collective investment vehicles which have exposure to physical property and property related assets. The Fund may also invest in other collective investment schemes, transferable securities, money market instruments, deposits, cash and near cash. The Fund does not have a specific benchmark. However, the performance of the Fund can be assessed by considering whether the objective for capital growth over the long term is achieved. There is no particular emphasis on any geographical area or industry or economic sector, other than to hold a minimum of 70% in UK real property assets to maintain qualification for the UK Direct Property sector.

VT Redlands Property Fund invests in assets that may at times be hard to sell. This means that there may be occasions when you experience a delay or receive less than you might otherwise expect when selling your investment. For more information on risks, see the prospectus and key investor information document.

Commentary

Cash fell by about half a percent in the fund over the month with the recipient funds being infrastructure holdings and bricks and mortar funds. The fund topped up the allocation to abrdn European Logistics Income fund and M&G Property. The allocation to BNY Mellon Global Infrastructure Income and Legal & General Global Infrastructure Index were increased too, although the holding in the Premier Miton Global Infrastructure Income fund was cut back a little.

Although some of the cash was put to work, the fund maintains elevated levels of cash as the uncertainty surrounding interest rates and inflation is causing heightened levels of volatility in the sector and we feel there is virtue in patience before fully reinvesting.

VT Redlands Fixed Income Portfolio

February 2023

Investment Objective

The objective of the VT Redlands Fixed Income Portfolio is to provide capital growth. The Fund seeks to achieve its objective primarily by investing in collective investment vehicles (including for example collective investment schemes, exchange traded funds and investment trusts) which provide exposure to fixed income strategies and assets. The Fund may also invest in other collective investment schemes, transferable securities, bonds, money market instruments, deposits, cash and near cash. The Fund does not have a specific benchmark. However, the performance of the Fund can be assessed by considering whether the objective for capital growth over the long term is achieved. Commentary

No new holdings were introduced to the portfolio over the month, and no existing holding entirely removed, so the twenty-three holdings that started the month were present at the end. There was portfolio activity though – the allocation to UK Sovereign bonds and investment grade debt was reduced by about half a percentage point each and elsewhere in the portfolio the allocation to cash rose by a little over one percent.

With the exception of cutting the weight to the Lyxor Gilt ETF, no holding ended February with a weight difference greater than or less than 0.25%. Although fixed income funds didn't fare to well in the month, the fund delivered a small degree of outperformance.
