Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower Risk			Higher Risk			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 4 because weekly historical performance data indicates that it has experienced average rises and falls in market prices historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Credit Risk:** Bonds and fixed interest securities are affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall and vice versa. Inflation will also decrease the real value of capital. The value of fixed interest securities is also affected by its credit rating.
- **Market Risk:** External factors can cause an entire asset class to decline in value and given the potential portfolio composition, the net asset value of the Fund is likely to be volatile.
- **Concentration Risk:** the Fund may hold a limited number of investments. If one of these investments falls in value this can have a greater impact on the Fund's value than if it held a larger number of investments.
- **Risk from use of derivatives:** Investments in derivatives may result in gains or losses that are greater than the original amount invested.

All the risks currently identified as being applicable to the Fund are set out in the "Risk Factors" section of the prospectus which may be obtained from the address in 'Practical Information' overleaf.
