## VT Sorbus Ethics Fund (the "Fund")

a sub-fund of VT Sorbus Vector Funds ICVC (the "Company")

Class A – Income Shares (ISIN: GB00BK1X3861)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

## Objectives and Investment Policy

The investment objective of the VT SORBUS ETHICS Fund is to provide a total return through a combination of capital growth and income over the long term (5 years +).

The Fund will aim to meet its objectives by investing predominantly (at least 80%) in companies which pass the following two filters:

(1) No investment will have material revenue exposure (more than 10%) to: the manufacture or supply of weapons; extraction of oil, gas and consumable fuels; metals and minerals; the sale or manufacture of tobacco; casinos and gambling or pornography;

(2) No investments will be selected unless the Investment Manager considers there to be potential, in the Investment Manager's opinion, for that investment to provide an attractive rate of return (with those which are not considered to offer this being excluded from the investment universe).

When making investment decisions, the Investment Manager will also consider whether, based on the Investment Manager's assessments of a company's own commitments (i.e. in its policies and procedures, such as CSR statements) as confirmed by the Investment Manager's own research and ongoing monitoring through assessment of third party sources such as media statements and journals be considered, through its actions and business to: (i) promote positive change in the spirit of at least two of the United Nations Sustainable Development Goals (SDG); and (ii) otherwise demonstrate positive attributes such as good governance and commitment to diversity.

The Fund may also invest (up to 20%) in other equities, bonds (investment grade and sub-investment grade) and collective investment schemes (including those managed or operated by the ACD) which do not satisfy the commitment noted in the paragraph above. There will also be exposure, indirectly, to various other asset classes including property and alternative assets such as commodities. The Fund may also invest in money market instruments, deposits, cash and near cash.

The Investment Manager undertakes ongoing monitoring, using sources such as reports and accounts, online media, social media and journals to monitor investments on an ongoing basis and if an investment would no longer pass through any of the filters it would be expected to be sold.

The Fund will not have any particular industry or economic sector focus and as such weightings in these may vary as required.

The Fund will be actively managed.

You can buy and sell shares in the Fund on any business day.

Any income from the Fund will be distributed twice a year.

The Fund may be suitable for investors who are willing to invest over the longer term (5 years).

For full investment objectives and policy details please refer to the prospectus.

## Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower Risk Typically lower rewards				Higher Risk Typically higher rewards		
1	2	3	4	5	6	7

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 5 because monthly historical performance data indicates that it has experienced relatively high rises and falls in market prices historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Liquidity Risk:** adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- **Risk from use of derivatives:** Use of derivatives may result in gains or losses that are greater than the original amount invested.
