

VT Tyndall Unconstrained UK Income Fund

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Tyndall Unconstrained UK Income Fund (the "Fund")

a sub-fund of VT Tyndall Funds ICVC (the "Company")

Class A (£) - Net Income Shares (ISIN: GB00BYX0D836)

Class A (£) - Net Accumulation Shares (ISIN: GB00BYX0D612)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The investment objective of the VT Tyndall Unconstrained UK Income Fund is to generate capital growth, alongside income that rises at least in line with the rate of inflation (as measured by CPI), over the long term (5 years).

The sub-fund will aim to meet its objectives by investing at least 80% in companies incorporated in the United Kingdom, or which have the majority of their economic activity in the UK.

In addition to investing directly in equities, the sub-fund may also invest in other transferable securities (such as bonds), collective investment schemes (which may include those managed and/or advised by the ACD or Investment Manager), money market instruments, deposits, cash and near cash.

There is no particular emphasis on any industrial or economic sector or company market capitalisation and, as such, the sub-fund is unconstrained in terms of the sectors and size of company in which it invests/has exposure to and relative weightings between such exposures.

Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) may be used for efficient portfolio management purposes including hedging (although it is expected that use of derivatives will be limited).

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Lower Risk				Higher Risk			
Typically lower rewards				Typically higher rewards			
1	2	3	4	5	6	7	

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 7 because weekly historical performance data indicates that it has experienced high rises and falls in market prices historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Risk from use of derivatives:** Investment in derivatives may result in gains or losses that are greater than the original amount invested.

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.
