

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Vanneck Investment Growth Fund (the "Fund")

a sub-fund of VT Vanneck Funds ICVC (the "Company")

Class E - Accumulation Shares (ISIN: GB00BMDW0N94)

Class E - Income Shares (ISIN: GB00BMDW0P19)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The investment objective of the Fund is to generate capital growth (after deduction of fees) in excess of inflation (Retail Price Index) over a rolling 5 year period).

The Fund seeks to meet its objectives by investing in a diversified portfolio, although at least 80% is expected to be invested in equities and bonds (which may be investment grade or sub-investment grade). The portfolio will be actively managed and the allocation to each (and indeed other asset classes) will not be fixed, although the allocation to equities is expected to range from 20%-80% based on the investment manager's views as to whether equity markets are over or undervalued. For example, at times, where the Investment Manager considers it prudent (based on market conditions, for example where the Investment Manager considers that equity markets are overvalued or exclusively volatile), a large proportion of the portfolio may take the form of bonds and/or cash (and less in equities) and vice versa.

The Fund may also invest in collective investment vehicles (which are expected to provide exposure to equities and bonds, and may include those managed and/or operated by the ACD or investment manager), money market instruments, deposits, cash and near cash.

The direct equity allocation (and any direct corporate bond investments) within the portfolio will be in equities/bonds listed on developed markets only (where it is expected liquidity is greater), specifically, equities must be listed on one of the following indices: FTSE 100, FTSE 250, S&P 500, Nasdaq, Nikkei 225 and STOXX Europe 600 ex UK. In the case of indirect exposure to equities and bonds, via funds, these underlying funds are expected to focus largely on investment in developed markets too and, for equities, those in the indices listed above (although there may also be exposure to other indices), although there may also be exposure to wider global markets. The Fund may only invest in Government Debt of the UK and US Governments.

Save as noted above, the Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required.

The Fund may use derivatives only for currency hedging purposes. It is not intended that the use of derivatives for efficient portfolio management purposes will increase the risk profile of the Fund.

You can buy and sell shares in the Fund on any business day.

If you hold accumulation shares, income from the Fund will be added to the value of your investment (i.e. dividend income will be included in the value of your shares).

If you hold income shares, any income from the Fund will be distributed twice a year.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 3 because simulated monthly historical performance data indicates that low to medium rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- **Counterparty risk:** The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- **Market Risk:** External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- **Currency Risk:** As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- **Liquidity Risk:** adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- **Derivatives risk:** use of derivatives may result in gains or losses that are greater than the original amount invested.
- **High equity exposure risk:** The Fund may have high exposure to equities. The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0%
Exit charge	0%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. In some cases you may pay less and you should speak to your financial advisor about this.

Charges taken from the fund over a year	
Ongoing charges	1.13%

Charges taken from the fund under certain specific conditions	
Performance fee	N/A

As the Fund is only to launch in November 2021, the ongoing charges figure shown here is an estimate of the charges and may vary from year to year. It excludes portfolio transaction costs. The Funds annual report for each financial year will include detail on the exact charges made.

You may also be charged a dilution levy on entry to or exit from the Fund.

For more information about charges, please see sections 3.6 & 7 of the prospectus, together with Appendix 1 of the prospectus, which may be obtained free of charge from the address in 'Practical Information' below.

Past Performance

Past performance is not a guide to future performance.

The share class and Fund are both to launch in November 2021. Accordingly, there is insufficient data to provide a useful indication of past performance to investors.

Performance is calculated in Pound Sterling.

Practical Information

The depositary for the Fund is NatWest Trustee and Depositary Services Limited.

You can obtain further information about the Fund, copies of the prospectus, annual reports and accounts and half-yearly reports and accounts in English, free of charge, from Valu-Trac Investment Management Limited, Orton, Moray, IV32 7QE.
