VT AJ Bell Moderately Adventurous Fund

Fund Information

Investment Manager:	AJ Bell Asset Management Limited
Authorised Fund Manager:	Valu-Trac Investment Management Limited (Valu-Trac)
Investment Objective:	The investment objective of VT AJ Bell Moderately Adventurous is to achieve long-term capital growth with a preference towards higher risk assets such as equities and less emphasis on lower risk assets such as cash and fixed income. This is to keep the Fund within a pre-determined risk profile. Capital is in fact at risk and there is no guarantee that capital growth will be achieved over a 5 year, or any period.
Investment Policy:	<p>The Fund will seek to achieve its objective (and so provide exposure to the asset classes noted in the objective) by investing predominantly (80% +), in index-tracking investments or strategies (those instruments and/or investment strategies that aim to track the performance of various financial indices) and which typically consist of collective investment schemes (including those managed or operated by the ACD) as well as equities, bonds and transferable securities.</p> <p>The Fund may also invest in non-index tracking collective investment schemes, equities, bonds, transferable securities, money market instruments, deposits, cash and near cash.</p> <p>The Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required. The Fund may have exposure to emerging markets through its investments in e.g. collective investment schemes or futures.</p> <p>The Fund's risk profile is managed by restricting the types of asset held and allocations to those assets. The risk profiles are determined by the external risk rating agency's forward looking volatility assumptions. The Fund aims to operate with a risk rating of 6, on a scale of 1-10 where 1 is an allocation to cash and 10 is an allocation to riskier equity regions such as Asia and emerging markets.</p> <p>Derivatives (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) are held only for efficient portfolio management purposes.</p>

Conclusion:

Green

The AFM has concluded that all services being provided in relation to the on-going management and administration of the fund, including those provided directly and those currently being provided by third parties, are operating as unitholders may expect.

The AFM has concluded that unitholders are receiving good value, in relation to Quality of Service.

The AFM has also assessed the investment risk within the Fund and has concluded that the level of investment risk taken is not out of keeping for an actively managed Fund of this type (further details on how the AFM arrived at this conclusion may be provided upon request).

The AFM has concluded that unitholders are receiving good value, in relation to Performance.

AFM Costs - General

Each unit class within the Fund has its own Annual Management Charge (AMC). The AMC may be thought of as being the amount deducted from a unit class's average net assets to pay for the investment management of that unit class; this charge will typically include a proportionate allocation from the Investment Management Fee, AFM fee and other, ancillary fees.

The current AMC of each unit class, together with the current, average AMC for the relevant, selected peer group, is shown within the table below:

Annual Management Charge (AMC)	Current	
		Peer Rank
Peer Group	0.72%	-
I Accumulation	0.31%	Lowest 17%
I Income	0.31%	Lowest 17%

Conclusion:

Green

The Investment Management Fee is proposed by AJ Bell Asset Management Limited. Owing to the limitations of the host AFM model which the AFM operates, the AFM is unable to comment upon the specific profit margin this fee may generate for AJ Bell Asset Management Limited; instead, the AFM will focus upon ensuring that this fee appears reasonable, in the context of the overall AMC.

The AFM fee is payable to Valu-Trac to cover the services undertaken by Valu-Trac as outlined in the Quality of Service section. The AFM will set fees based on the overall cost of operating the business. Most of the AFM's costs are fixed (such as staff and property costs), and the AFM will set its fees in such a way that ensures the costs are apportioned fairly across the range of funds which it operates. The AFM reviews its fee model via various means, such as through external independent consultancy and market benchmarking reviews against similar firms in the market. The results of these reviews are incorporated into the AFM's governance arrangements, up to Board level.

Other notable, ancillary fees may include the depositary, custodian, and auditor fees. The AFM regularly reviews these fees compared to other funds operated by the AFM and, where the information is available, other funds within the wider marketplace, to ensure that they remain competitive.

Unitholders are currently paying an AMC lower than the market average for similar funds.

The AFM has concluded that unitholders are receiving good value, in relation to AFM Costs – General.

Economies of Scale

The fund currently has assets under management (AUM) of greater than £250m; this is the threshold above which, we generally consider it reasonable to consider if economies of scale have been passed on to investors.

The fund has a tiered depositary fee, subject to a minimum amount, alongside other fixed fees, such as audit fees.

Conclusion:

Green

The AFM has concluded that unitholders are receiving good value, in relation to Economies of Scale.

The current and historic Ongoing Charges Figure (OCF) for each unit class within the fund, together with the current, average OCF for the relevant, selected peer group, is shown within the table, below:

The services provided in respect to this fund are also aligned with the AFM's normal operating model.

Conclusion

Green

The AFM has concluded that unitholders are receiving good value, in relation to Comparable Services.
